Everything we do on the farm or ranch produces compounding and cascading effects. These effects are never neutral in nature but either positive or negative. Create positive impacts with…

**Compounding**

Nature never supports or produces a monoculture. Nature always yields incredible diversity—in soil microbes, macro-organisms, plants and animals.

**Diversity**

Nature becomes stagnant if we settle into a routine with our management practices, so introduce periodic, planned disruptions in order to keep things moving forward.

**Disruption**
