

# THREE RULES OF ADAPTIVE STEWARDSHIP

## Compounding

Everything we do on the farm or ranch produces compounding and cascading effects. These effects are never neutral in nature but either positive or negative. Create positive impacts with...

## Diversity

Nature never supports or produces a monoculture. Nature always yields incredible diversity—in soil microbes, macro-organisms, plants and animals.

## Disruption

Nature becomes stagnant if we settle into a routine with our management practices, so introduce periodic, planned disruptions in order to keep things moving forward.
