# THREE RULES OF
ADAPTIVE STEWARDSHIP™

Compounding

Everything we do on the farm or ranch produces compounding and cascading effects. These effects are never neutral in nature but either positive or negative. Create positive impacts with...

Diversity

Nature never supports or produces a monoculture. Nature always yields incredible diversity—in soil microbes, macro-organisms, plants and animals.

Disruption

Nature becomes stagnant if we settle into a routine with our management practices, so introduce periodic, planned disruptions in order to keep things moving forward.
